Equivalent Fractions

Two fractions that name the same part of a region or set are **equivalent fractions**.

$$\frac{4}{5} = \frac{8}{10}$$

$$\frac{1}{4} = \frac{3}{12}$$

To make an equivalent fraction, multiply the numerator and denominator of a fraction by the same nonzero number.

$$\frac{3}{8} = \frac{?}{16}$$

$$\frac{3}{8} = \frac{6}{16}$$
