

Another Look

For use with Lesson 1-8.

Draw a Picture

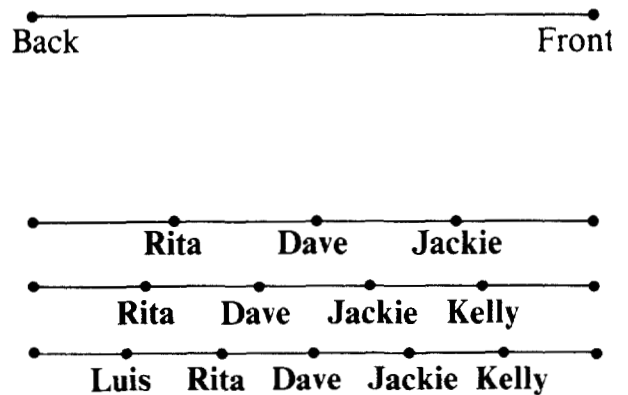

In the lunch line, Dave was between Jackie and Rita. Kelly was first in line. Dave was ahead of Rita, who was ahead of Luis. Who was fourth in line?

You can draw a picture to understand and solve problems.

First draw the lunch line.

You are told that Dave was between Jackie and Rita. You need to look at the rest of the problem to find out which side of Dave each was on. You are told that Dave was ahead of Rita, so show Dave ahead of Rita and behind Jackie.

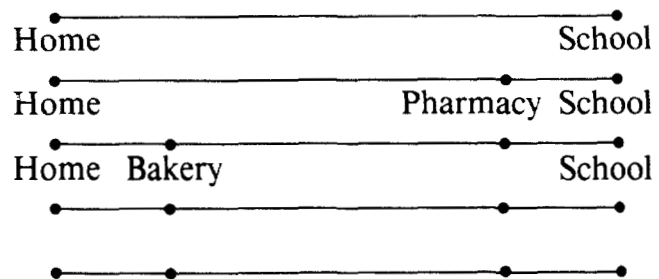

Now show Kelly in the front. Show Luis at the end of the line behind Rita.

Rita is fourth in the lunch line.

Complete the drawing to solve the problem.

- Simon walks past the post office, a bakery, a car wash, and a pharmacy on the way to school. The pharmacy is next to the school. When he leaves home, he comes to the bakery first. The car wash is between the post office and the pharmacy. In what order does he pass each on his way to school?

Draw a picture to solve each problem.

- Four students competed in the race. Kay came in second. Charles finished behind Ho. Bena won the race. In what order did they finish?

- The fence around Taro's yard is 60 feet long. There is a post every 5 feet. Taro is going to paint the posts. How many will he paint?
